

COMPUTER GRAPHICS FOR THE IBM PC

LEENDERT AMMERAAAL

Contents

Preface	vii
1 Introduction	1
1.1 History and scope of this book	1
1.2 Some special points for the C programmer	2
1.2.1 Type unsigned char	2
1.2.2 Direct input from the keyboard	3
1.2.3 Memory models; peek and poke	4
1.2.4 Console break	5
1.2.5 Accessing the 8088 I/O ports	6
1.2.6 Registers and software interrupts	7
1.2.7 The maximum stack size	9
1.3 Graphics adapters	9
2 Line drawing	12
2.1 Screen and pixel coordinates	12
2.2 Line drawing with integer arithmetic	14
2.3 Using interrupt 10H to light pixels	18
2.4 Immediate access to screen memory	19
2.5 Finding out the adapter type	22
2.6 Entering graphics mode	23
2.7 Quitting graphics mode	26
2.8 Abnormal program termination	28
2.9 Using the break key in graphics mode	29
2.10 A package for line drawing	30
2.11 An example	34
Updating the screen	36
3.1 Bit operations applied to screen memory	36
3.2 A rotating star	39
3.3 A moving curve	42
3.4 A fast routine for area filling	44
3.5 Shading	49

4 Graphics and matrix printers	56
4.1 Principles of matrix printers	56
4.2 Programs that print graphics results	57
4.3 Printing a screen dump	62
4.4 Printing a circle as a circle	64
4.5 Program text of GRPACK.C	68
5 Writing text in graphics mode	77
✓ 5.1 Bit patterns for characters	77
5.2 Functions to write text in graphics mode	78
5.3 A design of printable ASCII characters	80
5.4 A program generator for fonts	85
5.5 A demonstration program	88
5.6 Designing new characters	90
6 DIG: Drawing with Interactive Graphics	92
6.1 Introduction	92
✓ 6.2 Cursor movements	92
6.3 Sketch operations	96
6.4 DIG User's Guide	100
6.4.1 Program start and end; workstates	101
✓ 6.4.2 Cursor, pen position and drawing modes	102
6.4.3 The alpha workstate	103
6.4.4 Slanting lines and sets of marked points	104
6.4.5 Block commands	104
6.4.6 Vectors, circles and arcs	105
6.4.7 Constructing a new point	107
6.4.8 Using a matrix printer; area filling	108
6.4.9 B-spline curve fitting	109
6.4.10 Command summary	110
6.5 Source text	113
6.5.1 Program text of DIG.C (main program)	113
6.5.2 Program text of DIGFUN.C (functions)	117
6.5.3 Program text of DIGH.C (help messages)	127
Appendix A: GRPACK summary	132
Appendix B: A mouse as a graphics input device	135
Bibliography	137
Index	139
