

BERNARD KOLMAN

Department of Mathematics, Drexel University

*Elementary
Linear Algebra*

FIFTH EDITION

Macmillan Publishing Company
NEW YORK

Collier Macmillan, Inc.
TORONTO

Maxwell Macmillan International
NEW YORK OXFORD SINGAPORE SYDNEY

Contents

1 Linear Equations and Matrices

- 1.1 Systems of Linear Equations 1
- 1.2 Matrices; Matrix Operations 9
- 1.3 Algebraic Properties of Matrix Operations 21
- 1.4 Special Types of Matrices and Partitioned Matrices 30
- 1.5 Echelon Form of a Matrix 43
- 1.6 Elementary Matrices; Finding A^{-1} 63
- 1.7 Equivalent Matrices 72
- 1.8 LU-Factorization (Optional) 76
- Supplementary Exercises 86

2 Real Vector Spaces

- 2.1 Vectors in the Plane and in 3-Space 89
- 2.2 Vector Spaces and Subspaces 103
- 2.3 Linear Independence 117
- 2.4 Basis and Dimension 133
- 2.5 Coordinates and Isomorphisms 149
- 2.6 The Rank of a Matrix 166
- Supplementary Exercises 178

3 Inner Product Spaces 181

- 3.1 The Standard Inner Product on R^2 and R^3 181
- 3.2 Cross Product in R^3 (Optional) 193
- 3.3 Inner Product Spaces 203
- 3.4 The Gram-Schmidt Process 219
- 3.5 Least Squares (Optional) 234
- Supplementary Exercises 241

4 Linear Transformations and Matrices 245

- 4.1 Definition and Examples 245
- 4.2 The Kernel and Range of a Linear Transformation 255
- 4.3 The Matrix of a Linear Transformation 269
- 4.4 The Vector Space of Matrices and the Vector Space of Linear Transformations (Optional) 281
- 4.5 Similarity 291
- Supplementary Exercises 299

5 Determinants 301

- 5.1 Definition 301
- 5.2 Properties of Determinants 306
- 5.3 Cofactor Expansion 317
- 5.4 The Inverse of a Matrix 321
- 5.5 Other Applications of Determinants 327
- 5.6 Determinants from a Computational Point of View 333
- Supplementary Exercises 334

6 Eigenvalues and Eigenvectors 337

- 6.1 Diagonalization 337
- 6.2 Diagonalization of Symmetric Matrices 360

6.3 Real Quadratic Forms	374
6.4 Conic Sections	386
6.5 Quadric Surfaces	396
Supplementary Exercises	407

7 Differential Equations 409

Supplementary Exercises	427
-------------------------	-----

Appendix A: Preliminaries 431

A.1 Sets	431
A.2 Functions	432

Appendix B: Complex Numbers 435

B.1 Complex Numbers	435
B.2 Complex Numbers in Linear Algebra	443

Answers to Odd-Numbered Exercises 457

Index 479
