| | |
|---|----|
| Foreword | 1 |
| Preface | 5 |
| Chapter 1 Artificial Intelligence: An Introduction | 7 |
| 1. Introduction | 7 |
| 2. Artificial Intelligence | 7 |
| A. The Turing Test | 7 |
| B. Artificial intelligence fields | 8 |
| C. Difficulties that can arise in artificial intelligence | 9 |
| 3. Expert Systems | 11 |
| A. How expert systems work | 13 |
| Exercises | 15 |
| Chapter 2 Recursivity and Decidability | 19 |
| 1. Introduction | 19 |
| 2. Finite, Denumerable and Non-Denumerable Sets | 20 |
| 3. Programs with i Integer Inputs and j Integer Outputs | 23 |
| 4. Recursive Functions, Church's Thesis | 26 |
| 5. Recursive and Recursively Enumerable Sets | 29 |
| 6. Decidable and Semi-decidable Predicates | 33 |
| Exercises | 34 |
| Chapter 3 Formal Systems | 38 |
| 1. Introduction | 38 |
| 2. Definitions | 38 |
| 3. Some General Results | 43 |
| 4. An Illustrative Example | 45 |
| Exercises | 46 |
| Chapter 4 Propositional Calculus | 49 |
| 1. Introduction | 49 |
| 2. Definitions and Some Theorems | 53 |
| 3. Interpretation of the Formulae of \mathcal{P}_0 | 57 |
| 4. Some Consequences | 63 |
| Exercises | |

| | |
|---|-----|
| Chapter 5 First-order Predicate Calculus | 66 |
| 1. Introduction | 66 |
| 2. Terms, Atoms, Formulae: free and bound variables | 66 |
| A. Basic elements | 67 |
| B. Terms | 67 |
| C. Atoms | 68 |
| D. Formulae | 69 |
| E. Enumeration of Σ_{P_1} | 69 |
| F. Extension of the vocabulary | 69 |
| G. Reduction of Σ_{P_1} to a finite alphabet | 70 |
| H. Higher order systems | 70 |
| 1. Bound and free variables | 71 |
| J. Renaming and substitution | 71 |
| 3. The Formal System Pr of First-order Predicate Calculus | 73 |
| 4. Interpretations | 73 |
| A. Definitions | 74 |
| B. Example 1 | 75 |
| C. Example 2 | 76 |
| D. Some comments | 76 |
| E. Tautologies, consequences, etc. | 78 |
| 5. Some Consequences | 79 |
| 6. Axiomatic Theory | 79 |
| A. Definitions | 80 |
| B. Application of the results of Section 5 | 80 |
| C. Examples | 80 |
| D. Axiomatic Theories with Equality (ATE) | 83 |
| 7. Some Results Concerning Decidability and Undecidability | 84 |
| Exercises | 85 |
| Chapter 6 Preprocessing formulae: Herbrand's theorem | 90 |
| 1. Introduction | 90 |
| 2. Prenex Form | 90 |
| 3. Skolem's Theorem | 93 |
| 4. Herbrand's Theorem | 95 |
| 5. An Algorithm for Automated Theorem Proving | 99 |
| A. Use of semantic trees | 100 |
| Exercises | 102 |
| Chapter 7 Resolution and Unification | 107 |
| 1. Introduction | 107 |
| 2. Ground Resolution or Resolution Without Variables | 107 |

| | |
|---|---------|
| 3. Unification | 113 |
| A. Substitutions and substitution components | 113 |
| B. Unification algorithm for a pair of atoms A and B | 115 |
| C. Unification algorithm for atoms A_1, A_2, \dots, A_n | 117 |
| 4. General Resolution or Resolution with Variables | 118 |
| 5. Strategies for the use of the Resolution Method | 125 |
| A. Processing sets of clauses | 126 |
| B. Searching the deduction tree | 128 |
| Exercises | 144 |
| Chapter 8 PROLOG | 149 |
| 1. Introduction | 149 |
| 2. An Example | 149 |
| A. A PROLOG II program | 149 |
| B. Using the program | 153 |
| 3. PROLOG II Resolution | 156 |
| A. Basis of the method | 156 |
| B. The PROLOG II resolution method | 157 |
| C. An example of the PROLOG II resolution process | 159 |
| D. Limitations of PROLOG resolution | 162 |
| 4. Control, Arithmetic and List Processing in PROLOG | 165 |
| A. '/' as a control mechanism | 167 |
| B. Negation | 172 |
| C. Recursion and simple arithmetic | 176 |
| D. Built-in arithmetical operations in PROLOG II | 179 |
| E. List processing | 182 |
| Exercises | 187 |
| Bibliography | 191 |
| Index | 203 |
