Preface xi

A Few Words to the Student xix

## Chapter 0

Introduction 1

**Section 0. Introduction and Preliminary Examples 1**

**Section 1. Numbers and Sets: Basic Terminology 6**

Complement: Foundations 17

Problems for Section 1 19

**Section 2. Structure and Proof: Basic Terminology 21**

Appendix 29

Complement: Whimsical Syllogisms 31

Problems for Section 2 34

## Chapter 1

Numbers and Proof 37

**Section 3. Implication and Contrapositive 37**

Complement: Case Studies 46

Problems for Section 3 49

**Section 4. Indirect Proof and Prime Numbers 51**

Complement: Recipes and Algorithms 58

Problems for Section 4 60

**Section 5. Logical Equivalence and Divisibility 63**

Complement: The Division Algorithm 72

Problems for Section 5 75

**Section 6. Rationals, Pigeons, and Euclid 78**

Complement: Floors and Ceilings 87

Problems for Section 6 91

<b>Section 7. Irrationals and One-to-One Correspondence</b>	94
Complement: The Golden Section	101
Problems for Section 7	104

<b>Section 8. Positional Notation and Binary Arithmetic</b>	106
Complement: Subtraction in Binary	115
Problems for Section 8	118

## Chapter 2 Mathematical Induction 123

<b>Section 9. Quantified Statements and Their Negations</b>	123
Complement: Ramsey Numbers	132
Problems for Section 9	134

<b>Section 10. Well-Ordering Axiom</b>	136
Complement: Mean Values	146
Problems for Section 10	152

<b>Section 11. Consequences of the Well-Ordering Axiom</b>	154
Complement: Systems of Distinct Representatives	161
Problems for Section 11	164

<b>Section 12. Principle of Mathematical Induction</b>	167
Complement: Equivalence of WOA and PMI	176
Problems for Section 12	179

<b>Section 13. Functions and Sequences</b>	182
Complement: Recursion	193
Problems for Section 13	196

<b>Section 14. Inductive versus Deductive Logic</b>	199
Complement: Truth Tables	210
Problems for Section 14	213

## Chapter 3 Combinatorics 217

<b>Section 15. Sets and Counting</b>	217
Complement: Transfinite Sets	228
Problems for Section 15	230

<b>Section 16. Permutations and Combinations</b>	233
Complement: Poker	242
Problems for Section 16	244

<b>Section 17. Binomial Theorem</b>	247
Complement: Binomial Series	255
Problems for Section 17	259

<b>Section 18. Inclusion-Exclusion</b>	262
Complement: Derangements	272
Problems for Section 18	276

- Section 19. Generating Functions** 279 ✓  
 Complement: Catalan Numbers 288  
 Problems for Section 19 291

## Chapter 4

## Probability and Statistics 295

- Section 20. Probability Computations** 295  
 Complement: Occupancy Problems 304  
 Problems for Section 20 306
- Section 21. Conditional Probability and Tree Diagrams** 308  
 Complement: Paradoxes 317  
 Problems for Section 21 321
- Section 22. Independent Events** 324  
 Complement: An Application of Difference Equations  
 and Generating Functions 330  
 Problems for Section 22 334
- Section 23. Bayes' Theorem** 336  
 Problems for Section 23 344
- Section 24. Finite Probability Theory** 347  
 Problems for Section 24 359
- Section 25. Random Variables** 361  
 Problems for Section 25 370
- Section 26. The Binomial Distribution** 373  
 Complement: Modes 381  
 Problems for Section 26 384
- Section 27. Introduction to Statistics** 387  
 Complement: The Normal Approximation 399  
 Problems for Section 27 403

## Chapter 5

## Relations and Matrices 407

- Section 28. Zero-One Matrices** 407  
 Complement: Stirling Numbers 415  
 Problems for Section 28 420
- Section 29. Matrix Operations** 421  
 Complement: Vectors 432  
 Problems for Section 29 437
- Section 30. Special Matrices** 439  
 Problems for Section 30 447
- Section 31. Relations and Boolean Arithmetic** 448  
 Complement: Closure of Relations 457  
 Problems for Section 31 460

<b>Section 32. Transitivity and Orderings</b>	463
Complement: Chains and Antichains	472
Problems for Section 32	475
<b>Section 33. Equivalence Relations</b>	477
Complement: What Day of the Week Was D Day?	486
Problems for Section 33	488

## **Chapter 6**    **Graph Theory**    491

<b>Section 34. Introduction to Graph Theory</b>	491
Problems for Section 34	502
<b>Section 35. Subgraphs and Walks</b>	504
Complement: Hamiltonian Cycles and Paths	512
Problems for Section 35	515
<b>Section 36. Graphs and Matrices</b>	517
Complement: Bipartite Graphs	526
Problems for Section 36	530
<b>Section 37. Isomorphism in Graph Theory</b>	533
Complement: Turán's Theorem	542
Problems for Section 37	544
<b>Section 38. Eulerian Graphs</b>	546
Complement: The Ubiquitous Eulerian Trail	553
Problems for Section 38	555
<b>Section 39. Trees</b>	557
Complement: The Matrix-Tree Theorem	567
Problems for Section 39	572
<b>Section 40. Digraphs, Tournaments, and Networks</b>	574
Complement: Landau's Theorem	586
Problems for Section 40	590
<b>Section 41. An Application in Geometry</b>	592
Complement: Hamiltonian Planar Graphs	600
Problems for Section 41	602

<b>Appendix Table</b>	605
<b>The First Thousand Primes</b>	611
<b>Index of Names</b>	614
<b>Index of Symbols</b>	616
<b>References</b>	618
<b>Answers to Tutorials and Selected Problems</b>	623
<b>Index</b>	683
