SHELL PROGRAMMING

THE EDITED EDITION

STEPHEN C. KOCHAN and PATRICK H. WOOD

C O N T E N T S

	Preface	xii
1	Introduction	1
2	A Quick Review of the Basics	5
	Some Basic Commands, 5 — Working with Files, 7 — Working with Directories, 10 — File Name Substitution, 24 — Standard Input/Output, and I/O Redirection, 28 — Pipes, 33 — Standard Error, 35 — More on Commands, 36 — Command Summary, 39 — Exercises, 40	
3	What Is the Shell?	41
	The Kernel and the Utilities, 41 — Logging In, 42 — Typing Commands to the Shell, 45 — The Shell's Responsibilities, 47	
4	Tools of the Trade	55
	Regular Expressions, 55 — cut, 69 — paste, 74 — sed, 76 — tr, 80 — grep, 86 — sort, 92 — uniq, 97 — Exercises, 101	
5	And Away We Go	103
	Command Files, 103 — Variables, 107 — Exercises, 115	
6	Can I Quote You on That?	117
	The Single Quote, 117 — The Double Quote, 122 — The Backslash, 124 — The Back Quote, 127 — Exercises, 134	
7	Passing Arguments	137
	The shift Command, 145 — Exercises, 147	

8	Decisions, Decisions	149
	Exit Status, 149 — The <code>test</code> Command, 153 — The <code>else</code> Construct, 164 — The <code>exit</code> Command, 167 — The <code>elif</code> Construct, 169 — The <code>case</code> Command, 174 — The Null Command <code>:</code> , 182 — The <code>&&</code> and <code> </code> Constructs, 183 — Exercises, 186	
9	'Round and 'Round She Goes	189
	The <code>for</code> Command, 189 — The <code>while</code> Command, 195 — The <code>until</code> Command, 197 — More on Loops, 202 — The <code>getopts</code> Command, 208 — Exercises, 213	
10	Reading Data	215
	Exercises, 235	
11	Your Environment	237
	Local Variables, 237 — Exported Variables, 240 — <code>PS1</code> and <code>PS2</code> , 246 — <code>HOME</code> , James, 247 — Your <code>PATH</code> , 248 — Your Current Directory, 256 — More on Subshells, 258 — Your <code>.profile</code> File, 269 — The <code>TERM</code> Variable, 270 — Exercises, 272	
12	More on Parameters	275
	Parameter Substitution, 275 — The <code>\$0</code> Variable, 279 — The <code>set</code> Command, 280 — The <code>IFS</code> Variable, 285 — The <code>readonly</code> Command, 288 — The <code>unset</code> Command, 288 — Exercises, 289	
13	Loose Ends	291
	The <code>eval</code> Command, 291 — The <code>wait</code> Command, 293 — The <code>trap</code> Command, 294 — More on I/O, 298 — Functions, 305 — The <code>type</code> Command, 309 — The Restricted Shell <code>rsh</code> , 310 — Exercises, 312	
14	Rolo Revisited	315
	Design Considerations, 315 — <code>rolo</code> , 316 — <code>add</code> , 319 — <code>lu</code> , 320 — <code>display</code> , 321 — <code>rem</code> , 323 — <code>change</code> , 324 — <code>listall</code> , 326 — Sample Output, 328 — Exercises, 332	

15	Using the Korn Shell	333
	Running the Korn Shell, 334 — Command Line Editing, 335 — Command History, 336 — The <code>vi</code> Line Edit Mode, 337 — The <code>emacs</code> Line Edit Mode, 341 — Other Ways to Access Your History, 345 — Functions, 347 — Built-in Integer Arithmetic, 349 — Pattern Substitution, 357 — Parameter Substitution, 359 — The <code>alias</code> Command, 366 — Arrays, 370 — Job Control, 375 — Miscellaneous Features, 378 — Exercises, 384	
A	Shell Summary	387
	Startup, 387 — Commands, 387 — Comments, 388 — Shell Variables, 388 — Quoting, 391 — File Name Substitution, 392 — I/O Redirection, 393 — Exported Variables and Subshell Execution, 393 — Functions, 395 — Command Summary, 395	
B	Korn Shell Summary	421
	Startup, 421 — Commands, 421 — Comments, 422 — Shell Variables, 422 — Command Re-entry, 427 — Quoting, 432 — File Name Substitution, 433 — I/O Redirection, 434 — Exported Variables and Subshell Execution, 436 — Functions, 437 — Job Control, 438 — Other Features, 439 — Command Summary, 441	
C	For More Information	477
