# Contents

## *preface*

1. **Microprocessor—A physical system**
2. **The Microprocessor System**
  - 2.1 Central Processing Unit (CPU) 5
  - 2.2 Arithmetic-Logic Section 6
  - 2.3 Accumulator 6
  - 2.4 Status Registers 7
  - 2.5 ALU 7
  - 2.6 General Purpose Registers 8
  - 2.7 Control Registers 8
  - 2.8 Program Counter (PC) 8
  - 2.9 Stack Pointer (SP) 8
  - 2.10 Index Register (IX) 9
  - 2.11 Instruction Register (IR) and Decoder 9
  - 2.12 Timing and Control Unit 9
  - 2.13 The Clock 10
  - 2.14 Reset 10
  - 2.15 Interrupt 10
  - 2.16 Hold 10
  - 2.17 READ and WRITE 11
  - 2.18 IOR and MR 11
  - 2.19 Address Latch Enable 11
3. **The 8085A Microprocessor**
  - 3.1 Architecture and Organisation of 8085A 12
  - 3.2 The ALU 14
  - 3.3 Registers 14
  - 3.4 Timing and Control Unit 15
  - 3.5 Pin Configuration of 8085A 17
  - 3.6 Interface 18
4. **INTEL 8085 Assembly Language Programming**
  - 4.1 Instruction Set for 8085/8085A 22
  - 4.2 Data Movement Instructions 23

4.3	PUSH and POP	25	
4.4	Increment and Decrement Instructions	26	
4.5	Rotate and Shift Instructions	26	
4.6	Set, Compliment and Decimal Adjustment Instructions	28	
4.7	Add, Subtract and Compare Instructions	29	
4.8	AND, OR, EXCLUSIVE-OR Instructions	30	
4.9	JUMP, CALL and RESTART Instructions	31	
4.10	CONDITIONAL JUMP, CALL and RETURN	31	
4.11	Loops in Programs	32	
4.12	Uses of Subroutines	33	
4.13	Delay Subroutine	38	
4.14	Instruction Modes	43	
4.15	Instruction Bytes	43	45
<b>5.</b>	<b>Memories</b>		
5.1	Semiconductor Memories	45	
5.2	Non-volatile RAM	46	
5.3	Pin Configuration of RAM, EPROM and EEPROM	47	
5.4	Dynamic RAM	48	
5.5	Memory Map	49	50
<b>6.</b>	<b>Interfacing the Microprocessors</b>		
6.1	Speed	50	
6.2	Level	50	
6.3	Date Form	51	
6.4	Control Bus Function	51	
6.5	Bus-Demultiplexing	54	
6.6	Decoder and Address Decoding	54	
6.7	Mapping	58	
6.8	Timing Parameters	60	
6.9	READ Operation	60	
6.10	WRITE Operation	61	
6.11	WAIT State	63	
6.12	HOLD States	64	
6.13	HALT State	65	
6.14	Interrupt States	65	
<b>7.</b>	<b>Input-Output Devices</b>		
7.1	I/O Ports	66	
7.2	Key Board and Display	68	
7.3	Seven Segment Display and Key Board Interface	69	
7.4	D/A Converter	72	
7.5	A/D Converter	75	
7.6	Standard Peripherals	79	66

<b>8. Serial Interface Techniques</b>	<b>80</b>
8.1 Introduction	80
8.2 Protocols for Synchronous Serial Communication	80
8.3 IBM's Synchronous Data Link Control (SDLC)	80
8.4 RS-232C	83
8.5 Universal Synchronous Asynchronous Receiver Transmitter (USART)	84
8.6 Telephone Lines	87
8.7 Teletypes	88
8.8 Audio Cassette Tapes	89
8.9 Disc Systems	89
8.10 Floppy Discs	89
8.11 Video Monitors	90
<b>9. Controlling and Peripheral Devices</b>	<b>91</b>
9.1 Timer/Counter	91
9.2 Interrupt Controllers	93
9.3 DMA Controller	94
9.4 Single Step Logic	96
<b>10. Some Useful I/O Devices</b>	<b>97</b>
10.1 Introduction	97
10.2 Zero Crossing Detector (ZCD)	97
10.3 Peak Detector	98
10.4 Opto-Coupler	98
10.5 Relays	99
10.6 Parallel Communication Bus Standard	100
10.7 General Purpose Interface Bus (GPIB)	100
10.8 Multitalker-Listener	101
10.9 Printer	103
10.10 Sixteen Channel Multiplexer (1H6116)	103
<b>11. Programming a Microprocessor</b>	<b>107</b>
11.1 Writing a Program	107
11.2 Display Techniques for INTEL 8279	108
11.3 Program Examples	109
11.4 Developing Subprogram	117
11.5 Space and Speed	119
11.6 Data Structure	120
11.7 System Programming	120
11.8 Some More Program Development	120
<b>12. Microprocessor: An overview</b>	<b>144</b>
12.1 Types of Microprocessors	144

12.2	Variety of Microprocessor	145
12.3	Spacial Features	145
12.4	Instruction Set	146
12.5	Addressing Modes	147
12.6	Writing Programs	147
12.7	General Purpose Microprocessors	149
12.8	Motorola MC 6809	153
12.9	MOS Tech 6502	154
12.10	Single Chip Microcomputer	154
12.11	Motorola MC 68701	155
12.12	Bit Slice Processors	156
12.13	Zilog Z-8000 Family	157
12.14	Motorola MC 68000 Family	158
12.15	Texas Instruments TMS 9900 Family	158
12.16	32-Bit Processors	158
12.17	Zilog Z-80000	159
12.18	INTEL 80386	159
<b>13.</b>	<b>INTEL 8086</b>	
13.1	INTEL 8086: iAPX86 Family	160
13.2	Architecture and Organisation of 8086	160
13.3	Execution Unit (EU)	161
13.4	Bus Interface Unit (BIU)	162
13.5	Register Structure	162
13.6	Memory Addressing	165
13.7	Dynamically Relocatable Code	167
13.8	Dedicated and Reserved Memory Location	168
13.9	Pin Configuration of INTEL 8086	169
13.10	Addressing Modes	170
13.11	Instruction Set	171
13.12	Arithmetic Instruction	173
13.13	BIT Manipulation Instruction	175
13.14	Processor Control Instruction	178
13.15	Program Examples	178
13.16	INTEL 8088	179
<b>14.</b>	<b>Microprocessor Applications and Development of On-Line Real-Time Systems</b>	
14.1	Introduction	181
14.2	Voltage Measurement	182
14.3	Current Measurement	187
14.4	Frequency Measurement	188
14.5	Speed Measurement	193

- 14.6 Temperature Monitoring 195
- 14.7 Over Current Protection 199
- 14.8 Speed Control of DC Series Motor 201

## Appendices

207

- 1. 8085/8085 A Instruction Set 209
- 2. Z-80 Instruction Set 214
- 3. Some Instruction Sets of 8086 CPU 225
- 4. Some Advanced Features in 8085 A 228
- 5. Standard Peripherals for Motorola, Zilog and Rockwell Systems 233

235
